Market-linked Mechanisms

Themes

- [10]

Definition

A market-linked mechanism generates finances through either an auction process, or by establishing a dual-market in which REDD credits are linked to but are not fungible with existing CERs. Norway's proposal to auction Assigned Amount Units (AAUs), the Center for Clean Air Policy's "Dual Markets" approach and Greenpeace's TDERM are all examples of market-linked mechanisms (little redd book)
