## Summary

This document contains an overview of the rationale of the country profiles. The purpose of the country profile is to provide an overview of the contextual conditions that affect the REDD+ policy environment in a specific country, along with a preliminary 3E (effective, efficient and equitable) assessment of the REDD+ proposals for that country. The profile provides the background and the preliminary analysis of the context in which national REDD+ strategies are being developed.

This document contains an overview of the rationale of the country profiles.
