What is the REDD Desk?

Last updated: 8 March, 2016

The Global Canopy Programme's Internet platform – the REDD Desk – was launched in late 2009 as a centralised and collaborative knowledge platform to disseminate information on [REDD+ readiness](#) [10]. It was developed after the success of [The Little REDD Book](#) [11], launched by GCP in Poznan in 2008, and is now accessed by approximately 11 000 unique visitors per month from over 100 countries worldwide.

The REDD Desk is the largest collaborative resource for REDD+ information, news and analysis on the web. In partnership with our global network we work to meet the needs of diverse stakeholders by centralising and clarifying complex information related to REDD+, which facilitates knowledge sharing, capacity building, and the development of new pathways towards equitable, effective and efficient REDD+ design and implementation.

We aim to continually improve and update information on the REDD Desk and your [feedback on our website](#) [12] is welcome or feel free to [contact us](#) [13].

Follow [@theREDDdesk](#) [14] on Twitter for REDD+ news and platform updates.
