Forest Inventory and Planning Institute

Actor
Country: Vietnam
Type Academia
Level National
Active Yes
Viện Diệu Tra quy hoạch rừng
FPI

Summary
The Forest Inventory and Planning Institute (FPI) is involved in forest and carbon stock inventories, through developing methodologies for biomass and carbon stock inventories in forests and developing methodologies to estimate carbon stock by using remote sensing images.

The UN-REDD Programme is working with FPI on a National Reference Scenario, which includes digitalising forestry data with the use of remote sensing technology to verify the results.

Contact details
Name Dr. Nguyen Phu Hung
